- Excel Modeling (dashboards, ROI analysis)
- Python / Django / HTML / CSS
- Cross-border Coordination

INTERESTS

Chess (school champion, inter-school tournament winner), Debate, Violin

Jasurbek Azizov

Economics & International Relations Student | Research, Data Analysis & Global Affairs

Economics & International Relations double major at Webster University (Tashkent), with an exchange semester at Webster Geneva. I pair analytical training with hands-on execution: market and healthcare research and Excel-based performance tracking as a business analyst intern, and real-time coordination of a 15-driver operation serving New York clients from Tashkent. I also designed and launched Mehrly, an AI product for restaurants — an experience that taught me to judge a business by its customers and its numbers, not only its product. Working in six languages, I am seeking an internship in business analysis, economic research or an international organisation.

WORK EXPERIENCE

Business Analyst Intern

JvEdtech Medovation | Remote

- Designed and produced 10+ marketing fliers and presentations to support EdTech and healthcare outreach campaigns
- Researched 20+ sources on clinical trial data, diagnostic accuracy, and healthcare benchmarks to inform strategic business recommendations
- Represented the company in stakeholder meetings, contributing to cross-team coordination across EdTech and healthcare product lines
- Collected and analyzed program data to support Excel-based performance tracking for internal projects and educational initiatives

Dispatcher / Operations Coordinator

Barr Transit | Tashkent, Uzbekistan

- Coordinated real-time logistics and scheduling for a team of 15 field drivers in New York, working remotely from the Tashkent office
- Delivered continuous route updates and status checks throughout each shift to keep operations running smoothly
- Served as the primary point of contact for on-the-ground issues, resolving scheduling conflicts and delays in real time
- Optimized routing and resource allocation across the driver team to reduce delays and improve daily operational efficiency

PROJECTS

Smart Booking & Client Scheduling Engine

- Built a multi-staff appointment booking web app (React, TypeScript, Supabase; AI-assisted development) with automated reminders to reduce client no-shows for service businesses (barbershops, clinics, salons)
- Live - https://barber-shop-booking-six.vercel.app/

Mehrly — AI Google Review Responder (formerly SwissReply.ai)

- Designed and launched a Django SaaS using Gemini AI that drafts on-brand replies to Google reviews in the guest's language (FR/EN/DE/IT); negative reviews are always routed to a human for approval
- Live - https://mehrly.com/

CERTIFICATES & TRAINING

- UN CC:e-Learn — Climate Change Negotiations and Health (UNITAR / WHO / UNFCCC), Sept 2024
- UN CC:e-Learn — Gender Equality and Human Rights in Climate Action and Renewable Energy (UNITAR / UN Environment / UN Women), Sept 2024
- IELTS Academic — Overall Band 6.0, 2023
- Fundamentals of Programming in Python & Django (9-month course) — Monday Labs Academy, Bukhara
